EDUCATION

New York University Abu Dhabi

B.S. in Computer Science and Finance

Abu Dhabi, UAE

Expected May 2028

EXPERIENCE

Software Engineering Intern

Jun. 2026 – Aug. 2026

Waada | C#, ASP.NET Core, gRPC, PostgreSQL, Redis, GCP

Riyadh, Saudi Arabia

- Implemented **Portfolio, Payments, Claims** tabs (3/7 features) in Insurer Dashboard Launch. Tested via **Swagger, Dbeaver, Browser Dev Tools** and shipped to production after review.
- Extended Waada's brand protection platform from keyword to **domain monitoring**, implementing domain specific search and match scoring, scheduled background processing, result deduplication, and alerting across microservices.
- Shipped production changes across a **10+ microservice** insurance platform, evolving gRPC contracts, shared NuGet SDKs, database models, and API Gateway integrations while debugging authentication and agency management flows.

AI/ML Engineering Intern

Jan. 2026 – May 2026

McLeuker AI | Pytho, RAG, n8n, pgvector, AWS (EC2/ECS), Kafka

Paris, France

- Built and optimized **RAG pipelines** for fashion AI applications, integrating embedding based retrieval, pgvector database, REST APIs, and automated workflows to improve retrieval and orchestration efficiency by **25%**.
- Scaled production AI pipelines serving **10,000+ users** on AWS by implementing autoscaling and load balancing to support increased inference and retrieval traffic.

Machine Learning Researcher

May 2025 – May 2026

New York University Abu Dhabi | Pandas, Numpy, XGBoost, Random Forest, KNN, Seaborn

Abu Dhabi, UAE

- Built Python data pipelines to analyze **15,000 retracted academic papers**, integrating publication, retraction, and social media attention data in support of **4 research papers**.
- Developed and evaluated XGBoost, Random Forest, and KNN models, finding that higher social media attention was associated with a **54% greater likelihood of retraction** and a **48% shorter time to retraction**.

Data Analytics Lead Intern

Feb. 2025 – Jun. 2025

Enrichly (Hub71) | Power BI, Regression, Clustering, SQL

Abu Dhabi, UAE

- Led a **5 member team** to build an Impact Analysis Dashboard measuring the outcomes of Enrichly's educational AI platform, transforming Google Forms survey data from **5K+ users across 30+ datasets** into decision ready metrics.
- Applied **regression** and **clustering** to validate relationships between customer outcomes and platform engagement, surfacing insights that improved analytics efficiency by **45%** and informed decisions projected to increase revenue by **18%**.

PROJECTS

Kaisa Paisa? (Finance Tracker) | Next.js, FastAPI, PostgreSQL, Supabase, Redis, Grok

Live Demo

- Engineered and deployed a full stack personal finance platform implementing JWT authenticated expense management, monthly budgets, and spending analytics.
- Built an **AI powered financial insights engine** combining spending forecasts, budget utilization, and category level analytics with an LLM to identify spending patterns and generate personalized budgeting recommendations.

FailSpec | React, Vite, Express, Zod, Playwright, Git Worktrees

GitHub

- Built a local first developer tool that converts bug reports into executable **Playwright regression tests**, orchestrating AI driven failure investigation through a React/Vite frontend, Express API, and shared Zod contracts.
- Engineered an isolated verification pipeline using **Git worktrees and automated test execution** to reproduce failures without modifying the developer's working repository.

Pitch Mirror (AI Confidence Analyzer) | React, TensorFlow, MediaPipe, NLP

GitHub

- Developed a real time AI system using React, TensorFlow, MediaPipe, and NLP to evaluate presentation confidence, achieving **sub 200 ms inference latency**.
- Built a multimodal analysis pipeline combining facial and body pose signals with speech and language features to generate real time confidence feedback during presentations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C#, C++, C

Backend & Web: Next.js, React, Vite, Tailwind CSS, REST APIs, gRPC, ASP.NET Core, .NET, Supabase

ML & Data: TensorFlow, PyTorch, Scikit-learn, NLP, RAG Systems, LangGraph, Pandas, NumPy, SciPy

Systems & Cloud: Git, Docker, Vercel, CI/CD, Kubernetes, AWS, GCP, Azure, n8n
