PROFESSIONAL SUMMARY

Computer Science and Finance penultimate year student at NYU Abu Dhabi with experience leading teams, optimising data driven workflows, and delivering operational improvements across multiple startups. Analytical and results driven, with a track record of tackling complex problems at speed and shipping solutions that drive measurable efficiency in fast-paced environments.

EDUCATION

New York University Abu Dhabi

Bachelor of Science in Computer Science and Finance

Abu Dhabi, UAE

May 2028

EXPERIENCE

Software Engineering Intern

Waada

- Contributed to feature development across 10+ microservices using React, TypeScript, ASP.NET Core, PostgreSQL, and REST APIs, managing tasks and tracking progress from concept to release.
- Optimised end-to-end backend workflows for authentication, agency management, and brand protection through Redis caching, Elasticsearch, and Docker-based CI/CD.

Jun 2026 – Present

Riyadh, Saudi Arabia

Data Analytics Lead Intern

Enrichly (Hub71)

- Led a 5-member team to optimise analytics workflows, deploy machine learning models and performance dashboards, and track progress, improving processing efficiency by 45%.
- Analysed 10K+ user records and 30+ datasets using Python, regression, and clustering to surface operational insights, boosting projected revenue by 18%.

Feb 2025 – Jun 2025

Abu Dhabi, UAE

AI/ML Engineering Intern

McLeuker AI

- Optimised data architecture and backend infrastructure at a fast-paced AI startup, improving workflow automation efficiency by 25%.
- Scaled RAG pipelines to 10,000+ live users via AWS autoscaling and load balancing, coordinating across engineering and data functions.

Jan 2026 – May 2026

Paris, France

Machine Learning Researcher

New York University Abu Dhabi

- Built data processing pipelines supporting 4 research papers, using Python, NumPy, Pandas, and SciPy to clean, transform, and analyse large datasets.
- Optimised ML models through feature engineering and statistical analysis, iterating based on feedback from research leads.

May 2025 – May 2026

Abu Dhabi, UAE

PROJECTS

FailSpec

- Built a local-first TypeScript monorepo with a React/Vite frontend converting bug reports into evidence-backed Playwright regression tests via an Express API and shared Zod contracts.
- Engineered a safety-focused pipeline with automated lint/typecheck/test/build coverage for reliable, consistent output from concept to release.

Pitch Mirror (AI Confidence Analyzer)

- Developed a real-time AI system using React, TensorFlow, MediaPipe, and NLP to evaluate presentation confidence, achieving inference latency below 200 ms.
- Managed end-to-end delivery from concept to launch, coordinating design, model selection, and interface implementation.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified AI Practitioner

SKILLS

Data: SQL, Pandas, Power BI, NumPy, SciPy, Matplotlib, Seaborn

Languages: TypeScript, JavaScript, Python, C#, C++, C

Web/Frontend: Next.js, React, Vite, Tailwind CSS, REST APIs, gRPC, ASP.NET Core, .NET, Supabase

Tools: Git, Docker, Vercel, CI/CD, Kubernetes, AWS, GCP, Azure, n8n

ML/AI: TensorFlow, PyTorch, Scikit-learn, NLP, RAG Systems, LangGraph
