Professional Summary

Computer Science and Finance junior at NYU Abu Dhabi with production experience building distributed backend systems, machine learning pipelines, and data driven tools across multiple internships. Skilled across the full backend stack, from microservice architecture and CI/CD to AI/ML integration, with a track record of shipping reliable, scalable features in fast paced engineering environments.

Education

New York University Abu Dhabi

Bachelor of Science in Computer Science and Finance

Abu Dhabi, UAE

May 2028

Experience

Software Engineering Intern

Waada

Jun 2026 – Present

Riyadh, Saudi Arabia

- Develop and ship production backend features across **10+ microservices** using ASP.NET Core, C#, Entity Framework Core, PostgreSQL, gRPC, and REST APIs, extending API Gateway integrations, evolving shared SDKs/NuGet packages, and maintaining backward compatibility across distributed services.
- Design and optimize end-to-end backend workflows for authentication, agency management, and brand protection, delivering production-ready capabilities including reduced duplicate records, more consistent API responses, and safer cross-service integrations through asynchronous background jobs, Redis caching, Elasticsearch, and Docker based CI/CD.

AI/ML Engineering Intern

McLeuker AI

Jan 2026 – May 2026

Paris, France

- Engineered Supabase backend infrastructure, improving workflow automation efficiency by **25%** through optimized data architecture.
- Built RAG pipelines using OpenAI Embeddings, vector databases, n8n, and REST APIs, scaling to **10,000+** live users via AWS autoscaling and load balancing.

Machine Learning Researcher

New York University Abu Dhabi

May 2025 – May 2026

Abu Dhabi, UAE

- Supported **4 research papers** by building web scraping pipelines and processing datasets using NumPy, Pandas, and SciPy.
- Optimized ML models using PyTorch and Scikit-learn through feature engineering, statistical analysis, and model tuning.

Data Analytics Lead Intern

Enrichly (Hub71)

Feb 2025 – Jun 2025

Abu Dhabi, UAE

- Led a **5-member** analytics team to deploy machine learning models and dashboards, improving processing efficiency by **45%**.
- Analyzed **10K+** user records and **30+** datasets using regression and clustering, boosting projected revenue by **18%**.

Projects

Pitch Mirror (AI Confidence Analyzer)

- Developed a real-time AI system using MediaPipe, NLP, and speech-emotion recognition to evaluate presentation confidence.
- Built React, Tailwind CSS, and TensorFlow components achieving inference latency below **200 ms**.

FailSpec

- Built a local-first TypeScript monorepo converting React/Next.js bug reports into evidence backed Playwright regression tests using a React/Vite UI, Express API, shared Zod contracts, and Codex powered repository analysis.
- Engineered a safety focused pipeline with isolated Git worktrees, read only model inspection, allowlist validation, controlled Playwright execution, persisted evidence, and automated lint/typecheck/test/build coverage.

Certifications

- AWS Certified Cloud Practitioner
- AWS Certified AI Practitioner

Skills

Languages: Python, C#, C++, TypeScript, JavaScript, C

Web/Backend: ASP.NET Core, .NET, REST APIs, gRPC, PostgreSQL, Redis, Elasticsearch, Supabase, React

Tools: Docker, Kubernetes, Terraform, CI/CD, AWS, Azure, GCP, Git, Vercel, n8n

ML/AI: PyTorch, TensorFlow, Scikit-learn, RAG Systems, NLP, OpenAI APIs
